NHS Education for Scotland, Edinburgh, September 2017
(1) NHS Scotland National Early Warning Score (NEWS) and Sepsis Screening Tool

This iPhone and Android app – a collaboration between NHS Education for Scotland and the Scottish Patient Safety Programme – provides:

- A national early warning scoring system to alert clinicians to the deteriorating patient and acute illness.
- The app will have a new release following new criteria and MHRA regulation.

Available at: http://www.knowledge.scot.nhs.uk/home/portals-and-topics/sepsis-app.aspx
(2) NES Sepsis Interest Group

The (virtual) NES Sepsis Interest Group aims to support a coordinated approach to sepsis education, training and management.

Further information:
Contact Helene.Marshall@nes.scot.nhs.uk

(3) Turas Learn

This page offers introductory information on sepsis, with links to other resources.

Available at: https://learn.nes.nhs.scot/1010/patient-safety-zone/patient-safety-priorities/sepsis
(4) Publication – Sepsis Chapter in ‘Scottish Core Obstetric Teaching and Training in Emergencies’ (SCOTTIE) Course

This course supports maternity staff dealing with obstetric emergencies. All course participants receive a manual which contains a chapter on sepsis. This course is currently being updated.

Available at:  
http://www.scottishmaternity.org/scottie.htm  
http://www.knowledge.scot.nhs.uk/smmdp.aspx

Further information:  
Contact Helene.Marshall@nes.scot.nhs.uk
(5) Publication – Sepsis Chapter in ‘Scottish Maternity Recognition, Evaluation, Assessment, Critical Treatment and Stabilisation (REACTS) High Dependency Unit (HDU)’ Course

This course enhances staff skills and knowledge in the recognition and management of critically ill obstetric women requiring high dependency care. All course participants receive a manual, which contains a chapter on sepsis (currently under review).

Available at:
http://www.scottishmaternity.org/scottish-maternity-reacts.htm
http://www.knowledge.scot.nhs.uk/smmdp.aspx

Further information:
Contact Helene.Marshall@nes.scot.nhs.uk
(6) Maternal Sepsis e-Learning Package

This online package aims to support maternity care practitioners to spot the early warning signs of sepsis and take appropriate action. Simulated real-life scenarios are included to aid learning and teaching. The package is available publicly, but is also available to NHS Scotland Health Boards on the ‘learnPro NHS’ site.

The resource has been developed by the Scottish multi-Professional Maternity Development Programme (SMMDP) in collaboration with Healthcare Improvement Scotland and NHS Scotland (currently under review).

Available at:
http://www.scottishmaternity.org/maternal-sepsis-e-learning.htm

Further information:

Appendix

- Sepsis is a potentially life-threatening condition triggered by an infection.
- The body’s immune system goes into overdrive, setting off a series of reactions, including inflammation and blood clotting.
- This can lead to a significant decrease in blood pressure, which can mean that the blood supply to vital organs is reduced.
- Symptoms of sepsis may include fever or chills, elevated heart rate, and rapid breathing. Other symptoms can include severe muscle pain, slurred speech, pale or mottled skin, and confusion or disorientation.
- In the UK, it is estimated that there are 150,000 cases of sepsis every year, and over 40,000 of these are severe cases.
